Available after 6 Feb at 9:00

Developing a 1D CA

In this exercise a model of a 1D cellular automata (CA) will be created. You'll need to have a basic idea of how 1D CAs work; you can find an introduction in the lecture slides.

This assignment is graded. This assignment will count 8.3% towards your grade for the practical assignments (5% towards final grade). Deadline: **Wednesday, 15 February 2023, 23:59.**

Assignment Document

ICS2023-ca2.pdf (https://canvas.uva.nl/courses/42439/files/9869996?wrap=1) ↓ **(https://canvas.uva.nl/courses/42439/files/9869996/download?download_frd=1)**

Framework

For this assignment you will use the framework introduced in **assignment 1 (https://canvas.uva.nl/courses/42439/assignments/471945)** . Please also include the PyICS framework, so we can run your submission out-of-the-box.
